

# **ANGEL COMMUNITY CANAL BOAT TRUST**

## **BOAT MAINTENANCE POLICY**

1. Boat safety certificate: A BSC will be maintained current at all times. This will require the hull to be examined every 4 years, usually on a dry dock.
2. The boat will be docked at other times as required and as approved by the management committee.
3. Engine maintenance: The engine will be maintained as advised by the manufacturer with appropriate daily, weekly, 6 monthly and yearly checks. As appropriate maintenance will be carried out by ACCT staff or by appropriately trained and qualified engineers.
4. The skipper will report to the management committee on maintenance requirements at least quarterly. Major maintenance will be carried out annually during the winter maintenance period in accordance with a schedule of works drafted by the skipper, reviewed by the maintenance officer appointed (currently Robin King) and approved by the management committee.
